(Instead of cash, gift cards / merchandise will be accepted)

Each year we try to make this tournament about ALS awareness and do our best to take care of our players, volunteers and sponsors. When the check is sent to the Charity each year, we provide the names of those who participated and supported the cause. We cannot do as well as we have the past four years without generous caring business professionals like yourselves that can reach into your pocket and help those who no longer can help themselves.

Amyotrophic lateral sclerosis (ALS), often referred to as "Lou Gehrig's disease," is a progressive neurodegenerative disease that affects nerve cells in the brain and the spinal cord. Motor neurons reach from the brain to the spinal cord and from the spinal cord to the muscles throughout the body. The progressive degeneration of the motor neurons in ALS eventually leads to their death between 3-5 years after being diagnosed. When the motor neurons die, the ability of the brain to initiate and control muscle movement is lost. With voluntary muscle action progressively affected, patients in the later stages of the disease may become totally paralyzed. More information at [http://webcsoh.alsa.org](http://webcsoh.alsa.org)
